Disclaimer: The purpose of this Library is to aid health professionals with the interpretation of hemoglobin variant chromatograms and to suggest further studies for the final identification of the hemoglobin variant.

This collection should be used as a reference only. All information and materials provided in or through Bio-Rad’s Library of Variants website (the "Site") are strictly intended for educational and informational purposes in the areas of assisting discussions and understandings in the field of general scientific research only. The Site is not intended to provide, and should not be relied on as a source of, any medical advice whatsoever. Readers should consult with a specialist where appropriate. Bio-Rad and any authors, rights holders, and participants ("Provider(s)"") who have provided any additional information herein make no representations or warranties with respect to the accuracy or completeness of the contents of this work and specifically disclaim all actual or implied warranties including, without limitation, any warranty of fitness for a particular purpose. No Provider shall be liable for any damages arising from any use of this site in any form or legal theory whatsoever. In light of continuing regulations, developments, and advancements in the field of scientific research, you are urged to review and evaluate the information provided on this Site and consider, among other things, any changes in the instructions or added warnings and precautions that may be required. Should you have any questions or concerns, please contact us at: hemoglobins@bio-rad.com
Experience the Library of Variants

Explore the first digital reference database of HPLC cases collected from a global network of experts. Searching for information in the Library of Variants is simple and fast.

The purpose of this library is to educate professionals through the experience and knowledge of the global healthcare community.

http://hemoglobins.bio-rad.com

SHARE your knowledge by uploading your cases.

EDUCATE yourself by comparing your difficult cases against hundreds of hemoglobin variant references.

BECOME a more integral part of the global community of clinical laboratories involved in hemoglobinopathy and diabetes.
